Abstract (en)

[origin: EP2452790A1] The processing station (3,4) comprises a sheet transporting system and an upper tool (21), which is moved with a drive (4.1). A lower tool (23) is provided for breaking of waste. The upper tool comprises a tool holder (21.2) and a lifting tool (21.1). The distance between the lifting tool and the tool holder is variable. Independent claims are also included for the following: (1) a sheet punching or embossing machine for punching or embossing sheet made of paper, cardboard, or plastic; and (2) a method for discharging and filling of a sample sheet.
