Abstract (en)
[origin: EP2452895A2] The container is provided with a rectangular, standard sized and an open steel frame construction (1), where a funnel-like narrowing container (5) is provided for receiving the bulk goods. The steel frame construction has two lower longitudinal supports (2) which are free from connecting crossbars (4), such that a downwardly open and completely over the longitudinal extent of the steel frame construction a continuous free space is formed within the steel frame construction. An independent claim is also included for a container wagon with a frame.
