Abstract (en)

[origin: EP2453057A2] A flooring element (1) comprises a net structure made of a plastic material (2) having a plurality of first elements (4) and a plurality of second elements (6). Anchoring portions extend from the prevalent development plane of the net structure, which anchoring portions, in use condition, are destined to face towards a terrain surface. The element comprise at least an anti-slip element (10) situated on an opposite side to the anchoring portion with respect to the development plane (3) of the net structure (2).
