Abstract (en)

[origin: EP2453078A2] The device has a murder hole (2) for guiding swimming pool water from a front edge surrounding a water inlet slot toward a rear edge (23) connected to a water filtering and discharging body. The murder hole is connected with a location hole (6) provided in upper part of a wall (60) of swimming pool. Reinforcing element (8) is supported on support points (61, 62) located on the wall on two sides of the murder hole and extended in center of the points of wall and between the murder hole and a sundeck e.g. wooden duckboard. The element is provided against the front edge of the murder hole.
