Abstract (en)

[origin: EP2453095A2] The material (1) has a balance strip made of a flexibly deformable material and partially enclosed by a covering profile. Wall-lateral edges (5) of a metal window sill (2) are provided with a vertically and upwardly aligned wall strip (3). A profile strip (6) is sealingly attached on the wall strip, and surrounds the wall strip. The profile strip is enclosed by a form-stable housing (12) made of metal or plastic, where the housing is coupled with a neighboring wall. The profile strip consists of fine pored foam rubber, and the housing consists of aluminum or high-grade steel.
