Abstract (en)

[origin: EP2453101A1] The plate (4) has an external face (8) including a vertical flat smooth surface (8a) in a portion when the plate is positioned, where the portion is protruded toward interior of a building with respect to a carcass. A central portion (8b) of the external face includes protruding asperities e.g. longitudinal ribs (8b.1) and vertical ribs (8b.2) for promoting connection with a binder and the carcass. A lower face (9) comprises a horizontal flat smooth surface corresponding to a protruding portion on the carcass of the lower face, and is in contact with top of masonry and/or thermal insulation.
