Abstract (en)
The projectile (1) has cross-holes (6, 7) running through a projectile longitudinal axis or perpendicular to the projectile longitudinal axis. The cross-holes are formed in a forwardly tapered head (2), where diameter of one of the cross-holes amounts to 0.3 to 0.5 times of a projectile caliber. The cross-holes are formed in an offset manner in projectile longitudinal direction, where the projectile is made of lead alloy. The cross holes are formed as bag drillings.

Abstract (de)
Die Erfindung bezieht sich auf ein Geschoss (1) für eine Patrone, das wenigstens eine Querbohrung (6,7) aufweist.
