Abstract (en)

[origin: WO2011006732A1] The invention relates to a device for controlling an irradiation system for irradiating a moved target volume. Said device comprises an evaluation device for evaluating a substitute movement signal; an imaging device for recording image data of the moving target volume, which is activated or deactivated by a control device according to the evaluation of the substitute movement signal; an image evaluation device for evaluating the image data recorded by the imaging device; and an irradiation device that is activated or deactivated by means of an irradiation control device according to the evaluation of the image data. The invention also relates to a method for controlling an irradiation system, carried out on such a device.
