Abstract (en)

[origin: WO2011006633A1] The invention relates to an apparatus for labeling containers (22), in particular specimen containers for medical specimens, comprising: a printing device (3); a supply (5) and/or removal device (7) for supplying and/or removing at least one container to/from the printing device, characterized in that the printing device is configured such that it can be brought into at least one first position (A) and one second position (B), wherein in the first position, an automatic supply and/or removal of the container occurs due to the supply and/or removal device, and in the second position, a manual supply and/or removal of the container occurs.
