Abstract (en)
A container (10) for consumer goods comprises: a housing (12) having a hinge lid (34) and comprising one or two elongate slits (56,58); and a dispensing device (14,16) for dispensing a portion of the consumer goods (18) from the container. The dispensing device comprises a sliding element (14) mounted in the one or two elongate slits (56,58) of the housing for movement therein; and a lifting element (16) connected to the sliding element. The dispensing device is moveable between a first dispenser position, in which the portion of consumer goods is fully within the housing, and a second dispenser position in which the portion of consumer goods is at least partially protruding from the housing (12).
