Abstract (en)
[origin: EP2455305A1] The silo has a silo cell that is formed with several wall elements (5). The wall elements are provided with a hollow support (10) at nodal points and connected with each other using the hollow support. The hollow support is provided with the interconnected support segments (11) which are arranged with a tab (17) inside of hollow support, at specific angle. The tab is provided with a holder (20) for receiving the screws or nuts (15). The support segments are connected by the screw to form the hollow support.
