Abstract (en)

The crane has a load hook (20) fastened indirectly/directly at a crane hoist rope (50). A frame is suspended at the load hook for receiving a special load i.e. rotor blade (101), of a wind turbine (100). Control elements e.g. control ropes (40), of the frame suspended at the load hook are guided along a guide rope area (50a) of the rope. The guide rope area is formed by returning the hoist rope by a pulley block (23) via a guide roller (14) in a direction as a boom longitudinal axis to a lower anchorage point at the crane. The guide roller is mounted at a variable height at a crane boom. The control elements are spindles and/or cylinders and/or telescopic seaweeds and/or kink steering wheels.

Abstract (de)

Die vorliegende Erfindung betrifft einen Kran mit einem mittelbar/unmittelbar am Kranhubseil befestigten Lasthaken und einem am Lasthaken angehängten Rahmen zur Aufnahme einer speziellen Last, insbesondere zur Aufnahme eines Rotorblattes einer Windkraftanlage, wobei das oder die Steuerelemente eines am Lasthaken angehängten Rahmens entlang eines Führungsseilbereichs des Kranhubseils geführt ist/sind.
