Abstract (en)

[origin: EP2455537A1] The dryer (1) has rotatable drum that is arranged inside a housing (2) equipped with a loading opening that is closed by a door (3). A fan and a heating device in the housing are used to generate process air stream flowing through a heat-exchanger. An inspection flap (5) is arranged in the front wall (4) of the housing in the flow channel (7). An accessible filter insert (6) is included with the inner filter layer and outer filter layer in filter insert block and made to co-operate with the flow channel.
