Abstract (en)  
[origin: EP2455543A2] The paver has a mounting unit (10) arranged at a machine frame (2) for fastening a device for forming flowable material. The mounting unit is swingably supported at the machine frame around a pivot axis (14). A swivel unit (15) is provided with drive units for pivoting the mounting unit, arranged at the machine frame, around the pivot axis that runs in a working direction. A control unit is designed such that the drive units are controlled for executing pivoting movements in the mounting unit. The drive units comprise a bearing (15A), mounting plate (15B) and piston cylinder arrangement (15C).
