Abstract (en)  
[origin: EP2455559A2] The seal (1) has a sealing profile (3) comprising two sealing profile sections (6, 7) and tear-off webs (9b, 9c) between the two sealing profile sections. One of the sealing profile sections is removed by destruction of the tear-off webs, and a groove fixed by another one of the sealing profile sections is accessed from outside. The two sealing profile sections are separated from each other by an angled or curved slot (11c). Breadth of the slot is measured in such a manner that wall sections of the sealing profile sections lie together in due form.
