Abstract (en)

[origin: EP2455568A2] The band (1) has assembly aids for assembling shower enclosures with a fixed part (10). The fixed part is fastened to a building wall by fittings, and a door is articulately connected with the fixed part by upper and lower hinge bands with band parts. One of the band parts is connected with the fixed part, and the other band part supports fastening of the door. The aids are integrated into the band in a hinged bracket (2.1) of the former band part. The aids have a flange screw (4), and the fixed part is fixed on a subsurface e.g. shower tray, by the pressure of the screw.
