Abstract (en)

[origin: EP2455671A2] The device (8) has a trough-shaped recording retainer including a concave surface and a separate control element, where the element is provided below the retainer and in convex shape. A domestic appliance (1) is moved freely by adjusting the retainer. Functional part units i.e. cook zones (4, 5, 6, 7) of the domestic appliance or selected functions of the domestic appliance are optically displayed in form of a rocking motion and/or rotational movement of an operating element in the retainer. A top face of a carrier part is arranged with a worktop or a top face (3) of a cooking plate (2).
