Abstract (en)  
[origin: EP2455698A2] The present invention refers to a ground support structure (1) for long firearms, such as for example rifles and carbines, comprising a stand (2) with a plurality of legs (4) associated to a tilting telescopic support (8) through an orbital head (3) for selectively modifying - in rotation and inclination - the position of the tilting telescopic support (8), the latter apically carrying two support members (14, 15) on which a long firearm can be placed, at least one of said two support members (14, 15) comprising locking means for locking said long firearm to the tilting telescopic support (8).
