Abstract (en)
The device has a locking element (4) for locking an assembly element, where the locking element is accessible from a visible side (11) of a display element (1). A support is used for supporting the locking element, and a bore is arranged in the support at the periphery of the display element on the visible side of the display element. The locking element includes a shaft engaged in the bore, a head (42) and a truncated collar, concentric to the head. The collar is engaged in a notch of the assembly element located towards the exterior of the display element. An independent claim is also included for a method for securing and locking a display element.

Abstract (fr)
