Abstract (en)
[origin: EP2455920A1] A method of secure transfer of banknotes, including, loading banknotes into one or more security bags with a tamper proof seal; wherein the security bags have a first face including the seal and made from standard bag material, and a second face made from a mesh material that allows liquid to enter the bag; wherein the width of the bags is wider than the width of the banknotes such that when the banknotes are positioned near one side of the bag an extra portion is left over, folding over the extra portion of the security bag so that the first face of the bag is facing the first face of the extra portion to form an ink collection base; wherein the first face has perforations at least in the area of the ink collection base, positioning the security bags in an ink box that includes an inking system that releases ink from its top to its bottom if security of the ink box is breached; wherein the ink collection base is placed on the bottom of the box and the security bags extend upward toward the top of the box; closing the box; and activating the inking system of the box.
