Abstract (en)

[origin: EP2455956A1] The device has a micro-switch (14) provided with a base portion (16). A movable switching element (18) is located near the base portion. The actuators (20,22) are set for providing joint actuation of the micro-switch in the switched state. The actuator (22) and the base portion of the micro-switch are connected with each other such that the base portion is set in motion when the actuator is operated.
