Abstract (en)

[origin: EP2456016A1] The locking arrangement has an unlocking slide which is on the plug device and in operative connection with a latching hook (11) that is coupled to a latching nose (12). The latching hook is formed with a slot (13). The plug device is made to contact the peripheral module by pivot technique. The unlocking slide of the plug device is deflected from the latching hook and the plug device is unlocked to swing out the peripheral module.
