Abstract (en)

[origin: WO2011009663A1] The invention relates to a hydraulic vehicle brake system (1) having a preferably electromechanical brake booster (15). According to the invention, at least one wheel brake (5) is designed with a locking device (21) and, for a locking actuation, the brake booster (15) is actuated and the wheel brake (5) is locked in the actuated state.
