Abstract (en)

[origin: WO2011010114A1] The invention resides in a vehicle having a module configured as a structural component and a panel having a strengthener configurable to increase the planar strength of a portion of the panel and/or an interface configurable to enable the module to connect to another object or panel. The vehicle can have a plurality of modules and/or panels. The panels can be substantially planar and can be stackable, such that they tessellate.
