Abstract (en)  
[origin: EP2278099A1] The present invention concerns a cylinder lock comprising a cylinder housing having a plug receiving opening and a lock cam opening extending substantially perpendicular to said plug receiving opening, and a plug comprising a cylindrical portion with a curved surface, at least a first end opening for a first key, and a cam member mounted on the curved surface of the cylindrical portion of the plug so that the cam member is rotated when the plug is rotated in the housing.
