Abstract (en)

[origin: WO2011009778A2] The invention relates to a refrigeration appliance, in particular a domestic refrigeration appliance, comprising a housing (16) with a machine space, in which a compressor (8) is connected to the housing (16) by a fastening arrangement (17) via at least one compressor support element (18) and an absorbing element (20a, 20b). The fastening arrangement comprises at least one clamping piece (22) which is connected to the absorbing element (20a, 20b) and is inserted between two wall sections (27, 28) of the housing (16). The invention also relates to an associated method for assembling the compressor.
