Abstract (en)
[origin: EP2457699A2] The apparatus has a tank (2) that stores liquefied petroleum gas (LPG) fuel. A combustion chamber (1) is connected with the tank. A movable piston (6) is arranged within the combustion chamber, for driving a plunger (7). A metering device (4) is located between the tank and combustion chamber. A displacement structure is installed within the metering device. The fuel is discharged from the tank, when the displacement structure is moved by the operating force of power sources.
