Abstract (en)

A process (1) for manufacturing a packeting machine (10) adapted to make a plurality of bags (50), each of said bags (50) defining a filling volume (50a) containing a product, said packeting machine (10) including at least one continuous sheet (51) moved along a feeding trajectory (11) and defining a front portion (51a) and a back portion (51b) of said plurality of bags (50) and said manufacturing process (1) comprising a manufacturing step (2) including: manufacture of directional guide means (14) adapted to define a feeding trajectory (11), a plurality of manufacturing sub-steps (4) in each of which an operating module (12) is made, manufacture of an electric panel (20) and manufacture of a base structure (21); the manufacturing sub-steps (4) are carried out in parallel and the manufacturing process (1) comprises an assembling step (3) following the manufacturing step (2), in which the operating modules (12) are operatively connected with each other and to the electric panel (20) and structurally secured to the base structure (21).
