Abstract (en)

[origin: WO2008128724A1] The present invention comprises a method for controlling a load-moving device by at least two persons, comprising the steps: controlling the motion of the load-moving device by a first person; transferring control of the motion of the load-moving device to a second person; controlling the load-moving device by the second person. The present invention further relates to a corresponding controller of a load-moving device comprising a first, particularly permanently installed operating unit (10) and a mobile operating unit (20) for controlling the motion of the load-moving device for safe and effective performance of the method.
