Abstract (en)

[origin: EP2458068A1] A laundry drying equipment is provided, which includes a tub combination 13, an air heating passage 20, a condensing system 16 connected between the tub combination 13 and the air heating passage 20, and a blower 18, 38 that allows air to pass through the condensing system 16. The blower 18, 38 includes an air amplifier 40. Through the air amplifier 40, the flow amount and speed of the air passing through the condensing system 16 are greatly increased, so that the condensation efficiency is improved, thereby improving the drying efficiency of the equipment.
