Abstract (en)

[origin: EP2458095A1] The present invention refers to an apparatus for the operations of preloading and/or lifting of foundations. In particular, said apparatus consists in piles or micropiles P of metal, each of which is anchored to the structure S through a counterpipe C, external to P, provided with a specific adjustment and locking system R. Moreover, also disclosed in the present description is a method for the lifting of foundations which utilizes said apparatus.
