Abstract (en)

[origin: EP2458307A2] The refrigeration appliance (1) has heat insulated inner container connected with an evaporator (17), and drip-water collection unit (10) arranged at a distance (T1) from rear wall (3) of inner container. The evaporator is arranged at a distance (T2) from the rear wall, where distance (T2) is larger than the distance (T1) of drip-water collection unit. A deflection element (11) is arranged at the lower side of evaporator such that the dripping water from evaporator deflects into the drip-water collection unit.
