Abstract (en)
An electric switch comprising at least one knob 10, integrally secured to a control lever 1 and adapted to be handled by the user, and at least one electronic circuit 6 comprising a plurality of electric tracks 7. Said switch also comprises: at least one pad 3, comprising a plurality of domes or bubbles 4 and an elastic element 5; an actuation lever 2, which are adapted to permit the closing of at least one electric circuit, comprised in the electronic circuit 6, for the activation of at least one corresponding command as a function of the handling of the knob 10 by the user.
