Abstract (en)
[origin: WO2011012211A1] The present invention relates to a crib having a bed base and, completely surrounding the base, a wall that prevents the child from falling out of the crib, wherein at least a portion of the surrounding wall comprises a cladding made of a flexible material, in particular of fabric. The flexible cladding is retained at the bed base by a holding element and has a closable opening that enables a child to be laterally removed from the crib.
