Abstract (en)  
[origin: WO2011015760A1] The invention relates to an attachment system (1, 2) for removably attaching a dispensing member (3) onto a container neck (4), the system including: an attachment ring (1) that includes flexible axial tabs (16) capable of attaching around the tank neck (4), the tabs (16) being separated by axial slots (18); a locking sleeve (2) placed around the attachment ring (1) so as to engagingly lock the tabs around the neck (4), characterized in that the sleeve (2) forms a plurality of locking areas (26) for engaging with the tabs (16) so as to lock the latter around the neck (4); and a plurality of locking areas (28) not contacting the ring (1), the sleeve (2) being movable about the ring (1) between a mounting position, in which the locking areas (26) engage with the tabs (16), and a removal position, in which the locking areas (26) are located in the slots (18) so as to enable the tabs to deform in order to be freed from the neck (4).
