Abstract (en)

[origin: WO2011012658A1] The invention relates to an opening device for flexible packagings (4) of goods (5), particularly bottle systems. The opening device (2) comprises a positioning device (18) having a gripping device (19) for the packaging region to be opened, particularly for a lateral edge (6), and a separating device (20). The gripping device (19) comprises a suction device (25) and a clamping device (26). The invention further relates to a method for opening a flexible packaging (4) of goods (5), particularly bottle systems, wherein the packaging region to be opened, particularly a lateral edge (6) of the packaging (4), is positioned, gripped and separated. The packaging region to be opened, particularly the lateral edge (6), is grabbed by suctioning and clamping and then separated. The invention further relates to a system for producing and handling goods (5), particularly bottles or other piece goods.
