Abstract (en)

[origin: WO2011012804A1] The invention relates to a valve for dispensing a fluid product, which is to be mounted onto a neck (2) of a container (1) containing the fluid product, said valve comprising a valve body (10) including a metering chamber (15) and a valve (20) that is movable in said metering chamber (15) between an inoperative position and a dispensing position, said metering chamber (15) comprising a high seal (30) and a low seal (40) sealingly engaging with said valve (20), said valve for dispensing a fluid product comprising a neck seal (50) sealingly engaging with said valve body (10) and said container neck (2), said valve body being made of a single unitary part, said neck seal (50) and said low seal (40) being molded from a casting onto the unitary valve body (10).
