Abstract (en)  
[origin: WO2011012469A1] A water-conducting domestic appliance (1), which is in the form in particular of a laundry treatment machine for washing and/or drying laundry, has a housing part (2) and a tray (6) that can be slid into the housing part (2). A filling level measuring device (17) is provided, which measures a filling level of the tray (6). An illuminating means (20) is provided, which is activated by the filling level measuring device (17) depending on the filling level of the tray (6).
