Abstract (en)  
[origin: WO2011012468A2] A water-conducting domestic appliance (1), which can be used in particular as a laundry treatment machine for washing and/or drying laundry, has a housing part (2) and a tray (8) that can be introduced into the housing part (2). The tray (8) is of at least partly transparent or translucent design. Furthermore, the housing 2 is of at least partly transparent or translucent design. As a result, the user is able to look from the outside into the housing (2). For example, the user can check the filling level of laundry treatment agents (15, 16) in compartments (13, 14). In addition, the user is able to carry out a metering process.
