Abstract (en)

[origin: WO2011012770A1] (57) Abstract The present invention relates to a connector or jointing clamp for coated overhead cables, comprising two body sections, an upper body section (1) and a lower body section (2), contact teeth (3) in each of the body sections, a clamping screw (4) for moving the body sections and the contact teeth thereof towards each other, and a moment transmission nut (5), provided with a fraction point (6). It is in en- gagement by its internal thread with an external thread of the clamping screw (4) above the upper body section (1). The contact teeth (3) are attached to the body sections (1, 2) and coated with a plastic material, preferably elastomer (8), softer than the body sections, which extends onto the external sides of the body sections (1, 2) for added grip friction.
