Abstract (en)
There is described a protective cover (1) for a drink or food against sunlight and insects for use in combination with a container (2, 102) with a profiled shape for identifying said drink or food. According to the invention the horizontal top (40) is positioned to prevent insects from entering said container; and the vertical support (10) comprises two vertical support walls (20, 30) that have a mirror symmetrical shape about a vertical axis of symmetry (50) defined by their adjacent vertical sides (24, 34) at which said vertical support walls (20, 30) are connected; and the vertical support walls form an angle (60) about said vertical axis of symmetry (50) which is smaller than 180°.
