Abstract (en)  
[origin: EP2460630A1] The device has throttle lever (8), throttle lock (7) and mode actuator (9) which are arranged in a handle, and swingably supported between start position, unactuated position (48) and full acceleration position. The locking elements are provided in the mode actuator and throttle lever and engaged with each other in start position. The locking element of the throttle lever is maintained outside the swivel path of the locking element of mode actuator, in unactuated position of the throttle lever.
