Abstract (en)
[origin: WO2011015632A1] The invention relates to footwear in the form of a sandal or a mule, wherein toe straps (10) and middle straps (11), and for the sandal additional heel straps (12), are attached to a multilayer closed cassette (1a). The bottom layer of the cassette (1a) thereby comprises a walking sole body (2a) having a peripheral outer edge (2f) made of an elastically compliant material, having a profile sole (2a) on the bottom and having functional layers (2c, 2d) at different heights in the heel region (4c) and the toe region (4a) extending transverse to the longitudinal axis of the shoe. A calotte-shaped walking basin (3) is integrated in the middle region (4b) of the walking sole body (2a), in said walking basin a movable ball (5) is present. The top layer of the cassette (1a) comprises a rigid cover sole (7) contacting the functional layers (2c) in the heel region (4c) and connected to the outer edge (2f) of the walking sole body (2a), having a calotte-shaped receptacle (7a) on the bottom side of the cover sole for the ball (5) and a contact surface (8) made of elastically compliant material extending from the heel region (4c) to the toe region (4a) and contacting the functional layers (2d).
