Abstract (en)
[origin: WO2011018167A1] The invention relates to an absorbing incontinence article of the open type having added diaper ears, wherein the rear diaper ears comprise closure elements in the edge region, and to the folding of the diaper ears at high production speeds without impairing the functionality of the closure elements and achieving a user-friendly arrangement of the closure elements in the folded absorbing incontinence article at the same time. The invention further relates to a method for producing said absorbing incontinence article.
