Abstract (en)
[origin: WO2011015512A2] The invention relates to hair treatment products containing, in addition to at least one hair-fixing polymer, at least one polyether of formula (I) T-K-A-K'-T' (I) wherein A is a polyoxyalkylene chain consisting of ethylene oxide units or ethylene oxide and propylene oxide units, with a maximum part of 50 wt. % of propylene oxide units, in relation to the weight of A, K and K', which are independently a connectivity selected from a covalent bond or a molecule fragment having two free valencies; and T and T' are independently a molecule fragment comprising at least one substituent selected from an anionic radical -Si(OR)_x(R')_{3-x} wherein R and R' are independently a (C1 to C4) alkyl group (especially methyl or ethyl), x is 1, 2 or 3, at the most one radical of T or T' that can also be a (C1 to C6) alkyl group, an aryl group, an aryl (C1 to C6) alkyl group, a (C1 to C6) alkoxy group or a (C2 to C6) acyl group. The invention also relates to the use of said hair treatment products for temporary hairstyling, to a corresponding hair treatment method, and to the use of said polyether for preventing against greasy skin and/or hair.
