Abstract (en)
[origin: WO2011015208A1] The invention relates to a lifting roller stand (2) for a trampoline (1) and comprises a stand part having a guide, the stand being supported on rollers. A guide element that can be fixed on the trampoline (1) is arranged in the guide so that the height of the guide element can be adjusted. The guide element has an adapter (8) for fixing on the trampoline (1) and an actuating element for adjusting the height of the guide element. A hydraulic unit (12) is provided as means for height adjustment. The actuating element for actuating the hydraulic unit (12) is a pedal (11).
