Abstract (en)

[origin: WO2011015613A2] The invention relates to a protection device (10) for a test system (11), said test system (11) being used to test objects emitting toxic gases in the event of damage. Said test system (11) comprises one at least essentially closed test chamber (13) and a first suction device (17) for the test chamber, which is connected to the test chamber by a passage, and is connected to a door element (15) that connects the test chamber (13) to the surroundings. According to the invention, the test chamber (13) is surrounded by a protective housing (25) and the protective housing comprises a second suction device (34).
