Abstract (en)  
[origin: WO2011018177A1] The invention relates to a cutting machine (1) for food in the form of strands, comprising a housing (2) and a drive motor mounted therein for a cutting blade (11). To give the cutting machine (1) a more attractive design and at the same time make it more resistant, it is proposed that a housing surface (26) of the cutting machine has a coating (6) which includes at least oxide ceramic and polytetrafluoroethylene as constituents.
