Abstract (en)

[origin: WO2011015419A1] The present invention relates to a double belt conveyer for the production of a construction-ready element, to a method for operating such a double belt conveyer, and to the construction-ready element thereof. The double belt conveyer comprises a feed device for discontinuously or continuously feeding a first board (12, 112), different feed devices for feeding a first lateral limiting profile (18, 118) and at least one intermediate profile (119, 119) that is spaced apart from both lateral edges, an insertion device for inserting a foaming synthetic substance between the first lateral limiting profile and a first intermediate profile as well as between a lateral edge limitation that overlaps the first lateral limiting profile and the first or a subsequent intermediate profile, and a double belt device with an upper belt and a lower belt.
