Abstract (en)

[origin: WO2011015761A1] The present invention relates to the use, during the manufacture of cement, of a composition containing at least one dispersing agent and at least one sacrificial molecule for partially or totally maintaining the properties of the dispersing agent, the composition being in the form of either a liquid solution, an emulsion, or a suspension, the amount of the sacrificial molecule in the composition being at least 5 wt % of the weight of the dispersing agent and being added before or during the grinding of the clinker.
